Re: Sea Safe Community Certification

Dear Val:

It was good to meet with you at the recent Coastal Community Adaptation Forum and discuss the road to resiliency and adaptation that Cameron Parish has had to travel. As you heard, we enjoy a vibrant economy and wish to take advantage of all means available to meet sea level rise projections by addressing our challenges with the best science, innovation, and promising practices for equity, environment and our economy.

To this end, we understand that there is an interesting opportunity designed to recognize local adaptation efforts on behalf of our residents who live here and the broader public who invest and visit Cameron Parish. I feel that the Parish is making important strides to adapt to the future and we hope that the America's WETLAND Foundation might be able to include our community as one of the *Sea Safe Community Certification* demonstration projects that will help inform the ongoing dialogue about how America's coastal communities rise along with the tide to reach a future in which we can all live and prosper.

Thank you for the work you are doing to move this project along expeditiously, as the pressing issues we face require our immediate attention, along with the recognition of what we are and will be doing to adapt to the new normal of rising seas.

Sincerely,

Katie Armentor  
Administrator, Cameron Parish Police Jury
